This ASX announcement was authorised for release by Oil Search's Managing Director, Dr Keiran Wulff.

About Oil Search

Oil Search is a responsible energy company, with a proud history and strong heritage, that contributes to a sustainable future. Established in 1929, the organisation's purpose is to deliver low cost, high value energy that meets society's needs, and its ambition is to be the preferred energy company for all stakeholders.

With activities well supported by a clear hierarchy for allocating capital, prioritising sustaining capital and a strong, flexible balance sheet, Oil Search is a safe, low-cost, reliable business with a clear path to future growth.

Recognised for its proven capability to operate in challenging environments, Oil Search has a world-class resource base and a strong track record of working with communities and stakeholders. Sustainability is embedded across the Company and it aspires to set the standard for sustainable development.

Oil Search is listed on the Australian and PNG security exchanges (ticker: OSH) and its ADRs trade on the US Over the Counter market (ticker: OISHY).

INVESTOR PRESENTATION

June 2021

Disclaimer

This presentation is in summary form and does not purport to be complete. It should be read in conjunction with Oil Search's periodic reporting including but not limited to its Quarterly Reports, Half Year Report, Annual Report and other ASX announcements.

This presentation contains forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will or may occur in the future and are outside the control of Oil Search. Actual outcomes may differ materially from those expressed in such statements, due to a variety of factors, including: oil and gas prices, the extent and duration of the impact of current market conditions including but not limited to currency fluctuations, the demand for oil, the impact of Covid-19, overall global economic and business conditions impacting our business; development and use of new technology; drilling results, field performance, the timing of field development, reserves depletion, progress on gas commercialisation; the actions of third parties including our competitors, partners, contractors, subcontractors, and others; regulatory and governmental issues and approvals; and other factors discussed elsewhere in this presentation, and also under the "Material business risks" section (and elsewhere) in our Annual Report.

While every effort is made to provide accurate and complete information, Oil Search does not warrant that the information in this presentation is free from errors or omissions or is suitable for its intended use. Subject to any terms implied by law which cannot be excluded, Oil Search accepts no responsibility for any loss, damage, cost or expense (whether direct or indirect) incurred by you as a result of any error, omission or misrepresentation in information in this presentation. All information in this presentation is subject to change without notice.

Leading developer of world class energy assets

Strategy is centred around large scale, low cost and high growth assets

World class assets

PNG LNG

Industry leading 8.8 Mtpa (gross, 2020) project with 422 mmeob¹ 2P reserves and contracts to 2034

High margin, oil-linked LNG

> 70% EBITDAX margin² through the cycle, low-cost with high price realisations

Leading operating partnerships

ExxonMobil, Total and Repsol

Unrivalled growth

Production growth

~1.2 billion boe¹ of 2C resources driving increase in production of ~80% by 2030

Papua LNG

5.6 Mtpa brownfield expansion – first quartile in global LNG cost curve for development assets

Alaska Oil

Large, high quality development targeting >20% IRR at US\$60/bbl (2021 real)
Low GHG intensity with attractive growth pipeline

Discipline

Prudent capital management

Capital allocation maximising returns, funding expansions and retaining financial resilience

Cashflow driven

Focused and high quality portfolio delivering cash flow growth over the next 10 years and beyond

Proven operator

Leading PNG partner, leveraging operated assets
Experienced Alaska team with strong track record

ESG

Sustainability

Underpinning all business decisions
30% reduction in GHG intensity by 2030

People and Safety

0.94 TRIR and no process safety events in 2020, managing COVID-free operations

Community

Reinvestment in PNG and Alaskan communities
Strong relationships with local stakeholders

1. All petroleum reserve and resource estimates refer to Oil Search's 2020 Reserves and Resources (R&R) Statement in the 2020 Annual Report. PNG LNG gas reserves and resources are converted at 5,100 scf/boe. Other PNG gas is converted at 6,000 scf/boe. Oil Search is not aware of any new information or data that affects the information in the R&R Statement. No material assumptions and technical parameters have materially changed.

2. EBITDAX margin (earnings before interest, tax, depreciation, amortisation, impairment and exploration expensed divided by revenue) is a non-IFRS financial measure that has been presented to provide a more meaningful understanding of Oil Search's financial performance and has been derived from the financial statements which have been subject to audit by the Company's auditor.

Achieving our growth potential

Focused on commercialising a truly exciting pipeline of growth

Value drivers

- PNG LNG debt free after 2026
- PNG LNG production levels targeted to be maintained beyond 2030
- Pikka FEED progressing well, FID timing subject to funding
- Papua LNG stakeholders aligning on project schedule

Annual net production (mmboe)

The future of Oil Search

1. EBITDAX (earnings before interest, tax, depreciation, amortisation, impairment and exploration expensed) is a non-IFRS financial measure that has been presented to provide a more meaningful understanding of Oil Search's financial performance and has been derived from the financial statements which have been subject to audit by the Company's auditor. 2. Free cash flow is defined as operating activities less investing activities. Forecast methodology uses corporate assumptions and oil price assumptions as disclosed in note 13 to the 30 June 2020 half year accounts. All numbers are net to Oil Search, estimates only and are Oil Search's view of potential project development dates

PNG – Strong cashflows and strong partner alignment for growth Oil Search

Papua LNG well placed against competing projects

LNG Breakeven Costs¹

Papua LNG: Steps to FEED Entry

-  Government support of key projects (Papua, Porgera, P'nyang)
-  Strong partner alignment and project prioritization
-  Mobilise project teams (TotalEnergies upstream, ExxonMobil downstream)
-  Optimise synergies with PNG LNG infrastructure
-  Market soundings for LNG contracting
-  Downstream infrastructure sharing agreements
-  Restart project financing activities
-  **FEED entry**

1. Delivered to Asia. Source: Wood Mackenzie (2017/18)

Pikka Oil Development update

Unique large scale project with a low cost, short payback profile and superior GHG intensity

Project and funding options

Multiple funding options being progressed

- Sale process for 15% equity sell-down
- Infrastructure optimisation or monetisation opportunities
- Access to debt capital markets
- Project debt financing

Pikka – low cost¹, low GHG² versus peers

Pikka Phase 1: Steps to FID

- ✓ ~2x growth in 2C resources since acquisition to 968 mmbbl³
- ✓ Project redesign with a low-cost modular expansion strategy
- ✓ Optimised project sustainability focusing on minimising GHG
- ✓ Established experienced on the ground operating team
- ✓ Environmental approvals and permits secured
- ✓ Civils program complete
- ✓ FEED entry based on modular design
- ☆ **Multiple funding options under consideration**
- ☆ **FID targeted for 4Q21, subject to funding certainty**

1. Source: Wood Mackenzie Project FID Tracker – Q4 2020 2. Source: Wood Mackenzie Emissions Benchmarking Tool (average total GHG intensity in tCO₂e/kboe to 2045) 3. 2C resources cited on a gross basis. Oil Search current Pikka working interest is 51%

Priorities for 2021

Executing a clear set of priorities in 2021

Continue to sustain and improve low cost operations	Cost control	<ul style="list-style-type: none"> Continue to progress a reduction in opex by 40% (2023 target)¹
	Cashflow	<ul style="list-style-type: none"> Operating and exploration discipline driving strong cash flow conversion (75% reduction in average annual exploration capex)
Progress growth projects	Pikka	<ul style="list-style-type: none"> Targeting <\$40/bbl breakeven outcome and driving returns above 10%² FID targeted for 4Q21, subject to funding certainty
	Papua LNG	<ul style="list-style-type: none"> 2022 FEED, 2023 FID targeting 2027 first gas
Maintain a flexible balance sheet	Financing	<ul style="list-style-type: none"> Syndicated corporate loan refinancing in progress Enhancing balance sheet strength to support growth
	Hedging	<ul style="list-style-type: none"> Executed hedging arrangements with price floor of \$55/bbl Brent for 9 million barrels Consider long-term strategy to support balance sheet and cash flows
Optimise organisation for the future	Sustainability	<ul style="list-style-type: none"> Started carbon abatement and offset programs on path to 30% GHG intensity reduction by 2030 Build knowledge and develop plans for achieving net zero by 2050
	Divestments	<ul style="list-style-type: none"> Optimise the portfolio and allocate capital towards higher returning developments

1. Opex reduction for operated assets when compared with FY opex in 2019, based on Oil Search internal estimates. Actual opex will be subject to JV approvals (as relevant). 2. Returns cover capital, opex, capex, taxes and royalties.

Delivering value for shareholders

Well positioned to commercialise and optimise a world class set of assets to drive long term value
