Procedure 1.3.1 – Information to accompany an application for quotation as a Domestic Issuer

Note 1: By giving this information to PNGX, the issuer is taken to have warranted that all of the information and documents it has given, or will give, to PNGX in connection with quotation of its securities and their admission to the official list are, or will be, accurate, complete and not misleading. It also indemnifies PNGX to the fullest extent permitted by law in respect of any claim, action or expense arising from, or connected with, any breach of that warranty.

The information and documents referred to in this Procedure 1.3.1 (including any annexures to it) are covered by the warranty and indemnity mentioned above.

Quotation of securities and their admission to the official list is in PNGX’s absolute discretion and PNGX may refuse without giving any reasons.

If an item is not applicable, please mark it as “N/A”.

In this regard, it will greatly assist PNGX and speed up its review of the application if the various documents referred to in this Checklist and any Annexures are provided in a folder separated by numbered tabs and if the issuer’s constitution and copies of all material contracts are provided both in hard copy and in electronic format.

Note 7: Note that completion of this Checklist and any Annexures is not to be taken to represent that the issuer is necessarily in full or substantial compliance with the PNGX Listing Rules or that PNGX will quote the securities and admit them to its official list. Quotation of securities and their admission to the official list is in PNGX’s absolute discretion and PNGX may refuse without giving any reasons.

Note 8: If the applicant lodges a supplementary or replacement prospectus with PNGX, PNGX may require it to update the Checklist and any Annexures by reference to that document.

Procedure 3.18

Options

For the purposes of Rule 3.18 an *option may confer the right to a change in its exercise price, or a change to the number of *underlying securities over which it can be exercised, in any of the following cases:

- 1 If there is a *pro rata issue (except a *bonus issue) to the holders of the *underlying securities, the exercise price of an *option may be reduced according to the following formula:

$$O(new) = O(old) - \left(\frac{E * (P - (S + D))}{N + 1} \right)$$

Introduced 03/07/2023

Example: The capital of a company comprises ordinary shares and options over unissued ordinary shares exercisable into 1 share (E) at PGK1.00 each (O_{old}). The company announces a 4:7 pro rata issue. There is no dividend (D) payable. The issue price (S) for the shares under the rights issue is PGK2.00. The volume weighted average price (P) that ordinary shares trade at over the 5 trading days ending on the day before the ex rights date or ex entitlement date is PGK3.00 after the announcement. To receive one right a shareholder must hold 1.75 ordinary shares ($7 \div 4 = 1.75$, which is N). The amount by which the exercise price of an option is to be reduced is calculated as follows:

$$O(new) = O(old) - \left(\frac{E * (P - (S + D))}{N + 1} \right)$$

$$O(new) = 1 - \left(\frac{1 * (3.00 - (2.00 + 0))}{1.75 + 1} \right)$$

$$O(new) = 63.6364 \text{ toea}$$

The new exercise price of the option is 63.6364 toea and the option holder has gained the benefit of any bonus element in the pro rata issue. This benefit is the same as that conferred on shareholders. There is no change in the number of shares to which the option holder is entitled. At the time when the option is exercised, it may be necessary to round up or round down any fraction of a toea remaining after aggregating the exercise price of each of the options exercised by the holder

Example: If there has been no trading over the 5 trading days ending on the day before the ex rights date or ex entitlement date E is PGK2.00. To receive one right a shareholder must hold 1.75 ordinary shares ($7 \div 4 = 1.75$, which is N). The amount by which the exercise price of an option is to be reduced is calculated as follows:

$$O(new) = O(old) - \left(\frac{E * (P - (S + D))}{N + 1} \right)$$

Listing Rules Procedures

$$O(\text{new}) = 1 - \left(\frac{1 * (2.00 - (2.00 + 0))}{1.75 + 1} \right)$$

$$O(\text{new}) = 1.00 \text{ toea}$$

The exercise price of the option remains 1.00 toea. There is no change in the number of shares to which the option holder is entitled.

O(new) = the new exercise price of the *option

O(old) = the old exercise price of the *option

E = the number of *underlying securities into which one *option is exercisable

Note: E is one unless the number has changed because of a bonus issue.

P = the lesser of

- i. the *volume weighted average market price per *security of the *underlying securities, calculated over the 5 *trading days ending on the day before the “ex rights” date or “ex entitlements” date; and
- ii. the subscription price for a *security under the *pro rata issue

S = the subscription price for a *security under the *pro rata issue.

D = the dividend due but not yet paid on the existing *underlying securities (except those to be issued under the *pro rata issue).

N = the number of *securities with rights or *entitlements that must be held to receive a right to one new *security;

2

If there is a *bonus issue to the holders of the *underlying securities, the number of *securities over which the *option is exercisable may be increased by the number of *securities which the holder of the *option would have received if the *option had been exercised before the *record date for the *bonus issue.

Example: The capital of a company comprises ordinary shares and options over unissued ordinary shares exercisable at PGK1.00 each. The issuer makes a 1:1 bonus issue. An option holder with 1000 options with a total exercise price of PGK1000 will have an entitlement to 2000 securities for a total exercise price of PGK1000. Each option is exercisable for PGK1.00 and entitles the holder to 2 shares. The exercise price per option stays the same (ie PGK1.00). If the issuer has a further 1:1 bonus issue, the option holder would become entitled to 4000 securities for a total exercise price of PGK1000. Each option is exercisable for PGK1.00 and entitles the holder to 4 shares. The exercise price per option stays the same (ie PGK1.00).
